-55	Stealing, cheating, lying
-60	Lack of conscience (Bernie Maddox).
-70	Schizophrenia, suicidality, child abuse secret keeper, suicide terrorists
-75	Child abuser, rapist
-80	Child molesters
-90	Killers
-100	Time bombs ( <i>a la</i> Sandy Hook and Columbine), hit men
-110	Political mass murderers with leadership abilities (Joseph Stalin)
-120	Serial killers open to appeal (Jeffrey Dahmer, Richard Ramirez, Ailene Wournos)
-130	Sadistic mass murders with leadership abilities (Adolf Hitler, Saddam Hussein)
-140	Extra cold serial killers (John Wayne Gacy, Ted Bundy)
-150	Lowest known consciousness, cruelest behaviors (Uday Hussein)

## Behavior Cohorts on the Predictor Scale

# THE PREDICTOR SCORE SHEET

Subject Name: \_\_\_\_\_ Date: \_\_\_\_\_

Childhood Experiences		
<b>Bonding/Attachment</b> [ $\pm 40$ ]		
Healthy Maternal Diet v. Prenatal Assaults	$\pm 5$	
Quality of Attachment	$\pm 15$	
Continuity of Attachment (early daycare, abandonment, rotating caregivers)	$\pm 20$	
<b>Safe Separation-Individuation</b> [ $\pm 30$ ]		
Natural Consequences v. Physical Abuse and/or Weak Discipline		
Age	$\pm 4$	
Intensity	$\pm 3$	
Frequency/Duration	$\pm 3$	
Safe Affection v. Sexual Abuse		
Age	$\pm 4$	
Intensity	$\pm 3$	
Frequency/Duration	$\pm 3$	
Identity & Confidence Building v. Emotional Abuse		
Age	$\pm 4$	
Intensity	$\pm 3$	
Frequency/Duration	$\pm 3$	
<b>Ethics</b> [ $\pm 30$ ]		
Expression Ethic v. Repression Ethic	$\pm 15$	
Modeling Personal Responsibility v. Blaming & Judging Ethic	$\pm 15$	
Childhood Subtotal >>	$\pm 100$	
Childhood Traumatic Brain Injury (TBI)		
Did the child experience a serious blow to the head on one or more occasion? (warrants a negative score only, 0 to -20, based on severity and frequency)		
Childhood TBI Subtotal >>	- (0-20)	
Adult Modifiers		
Note: Additions or deductions higher than 50 should be reserved for extreme modifications.		
<b>Mitigating Factors</b> (warrants a positive score only, 0 to +100)		
List subject's factors below (e.g., therapy, meditation, "hero's journey," good company).	+ (0-100)	
<b>Compounding Factors</b> (warrants a negative score only, 0 to -100)		
List subject's factors below (e.g., substance abuse, bad company, anti-psychotic Rx).	- (0-100)	
Adulthood Subtotal >>	$\pm 100$	
The Predictor Score		
Add the three subtotals from above to reach The Predictor Score. For standardization, the maximum total score in either direction is 150. If your total is higher than +150, enter +150. If your total is lower than -150, enter -150.		
	$\pm 150$
